- Having good understanding of using **Assertions** and **Annotations, TestNG** Suite in TestNG framework.
- Test Script Execution, debugging and fixing the Automation issues using **Jira**, Performed **API** Testing using **POSTMAN.**
- Performed Cross Browser, Multiple Browser and Parallel Testing using Automation through Selenium Webdriver. Handling **Popups, List Box & Actions. Handling Synchronization (Implicit and Explicit).**
- Good Knowledge in **Saleforce Testing**.

TYPES OF TESTING PERFORMED

- Programming Language
- Smoke Testing
- Sanity Testing
- Functional Testing
- Non functional Testing
- Exploratory Testing
- Monkey Testing
- Retesting
- Regression Testing
- Parallel Testing
- Cross Browser Testing
- API Testing
- UI Testing

PROFESSIONAL WORK EXPERIENCE

- Brain Vision Technology , Pune.
Software Test Engineer

EDUCATION

- **BCS (Batchelor Of Computer Science) - 2019**
Savitribai Phule Pune University
- **HSC - 2016**
Maharashtra State Board, Pune
- **SSC - 2014**
Maharashtra State Board, Pune

- English
- Hindi
- Marathi

PROJECT PROFILE

Project 1

- Project Name : **Eagribasket**
- Domain : E-commerce
- Technologies : Java ,SQL

Project Description :

This Eagribasket.com Application is developed in Java for online shopping purpose. This website is useful for customer. Customer is able to register and login into system. customer is able to purchase agricultural product from this website he has a facility to pay amount online. Customer can create his own shopping cart and manage his cart.

Roles And Responsibilities :

- Understanding the requirements and communicating with team for better understanding of the requirements.
- Responsible for testing deliverables, prioritizes and monitors activities to meet such dates for individual assigned features.
- Reporting daily testing status in scrum call with team .
- Identified End to End Test Scenarios, Test Cases and Test Data Execution of test cases.
- Interact with developers and discussed technical problems, Bugs Tracking and Generating Reports.
- Participating Weekly and Daily Scrum calls, Sprint meetings, Retrospective meetings with the Business team.
- Identification of defects, registering them in JIRA and reporting them to the onsite lead.
- Performing Functional Testing, Regression Testing and Re-Testing.
- Validation of Expected output vs Actual output in respective database tables Using SQL.

Project 2

- Project Name : **Deal Store**
- Domain : CRM
- Technologies : Java ,SQL

Project Description :

This the application which is useful to the new customers who set different quotation as per his/her requirement from the respective dealer.

Roles And Responsibilities :

- Understand the software requirments specification (SRS) document
- Responsible for understanding current application functionality.
- Responsible for creating Test Plan ,Test cases, test execution.
- Preparing test cases based on the requirements and FIS documents .
- Reporting daily testing status .
- Responsible for bug tracking and reporting them accurately.
- Participating Weekly and Daily Status Reports on Project Progress.
- Participating Weekly and Daily Scrum calls, Sprint meetings, Retrospective meetings with the Business team.
